### Experience

#### DocsVision // Web Solutions Developer (2021 > 2023)

\ Development of low-code platform, system for managing business processes and electronic document management.

\ Conducted a security audit of the application and eliminated vulnerabilities which could potentially lead to losses in millions and reputational damage;

\ Significantly improved the key components of the app to handle the display and manipulation of massive amounts of data, and dedicated myself to making this as efficient and user-friendly as possible.

\ Improved quality of existed architecture through refactoring and by implementing new strategies and best practices which made code base of entire app more clean, reliable and expandable and made opportunity to scale and deliver new features faster.

\ Conducted 8 meetups inside company and increased base level of skills and knowledges in a team.

\ Was solving unique, complex and urgent problems as third line of support for need of biggest companies of Russia and CIS.

#### BeeJee // Web Developer (2020 > 2021)

\ Development platform for HR management.

\ Implemented new features and enhancements, contributing to the overall improvement of user interfaces and user experiences.

\ Made a few of optimizations that made it possible to reduce the size of the bundle by 30% and speed up the loading and operation of the web application.
